

## 97 ADJUSTABLE LENGTH BEAM MOUNT CHIN-UP BAR: MSRP: 99.9900

### DESCRIPTION

Expand your workouts with the Beam Mounting Kit. The kit can mount to the bottom of any beam or joist, creating a durable pull-up station with lots of flexibility. The unit also offers adjustable height and mounting placement to accommodate user height and mounting options. Each post measures 17" x 2" and is 17" in length.

#### Adjustable 48" Bar and Post

The posts feature 2 inserts on each post to allow for height adjustment of the 48" Chin-up bar. Finding the perfect height has never been easier!

#### Diverse Mounting Post

Each post comes can be mounted on any side of each post to almost all beams and joists. This allows for a pull up station that is stable and secure. Each post measures 17" x 2" x 2".

#### Adjustable Width

Fully adjustable post placement. The adjustable length chin-up bar is built around a heavy duty coarsely threaded bar which allows the unit to be cut at any length. Meaning this bar can be adjusted to fit any length under 48". This allows for a large variety of mounting options and the ability use any bar width that works for the users specific needs.
