

- 1) Attach bracket item #2 using the hardware supplied in the zip lock bag #5 to the handlebar.
- 2) Attach bracket item #3 for the speed sensor to the frame of your bike.
- 3) Attach magnet item #4 to the flywheel of your spinner bike. (Magnet found in zip lock bag)
- 4) Connect speed sensor wire item #6 to monitor item #1
- 5) Use the supplied plastic ties to secure the speed sensor wire to your spinning bike.

Note: The speed sensor item #3 reads the magnet item #4 on each rotation.

For this event to be detected properly there must be a 1/8" gap between the speed sensor and the magnet when the installation is complete.
